ABOUT US

ABM Industries is a recognized leader in architectural and structural innovation across the UAE. We bridge traditional craftsmanship with modern engineering, delivering high-performance GFRC and modular solutions that shape the region's evolving skyline.

With a fully equipped factory and a skilled workforce, we handle everything from decorative façades to large-scale modular infrastructure, ensuring reliable execution and modern design in every project.

As part of our regional growth, **Pan Gulf** operates in the Kingdom of Saudi Arabia as an extension of ABM Industries, delivering the same expertise and quality standards across the GCC.

Vision

To set the global standard for architectural aesthetics and modular efficiency, becoming the preferred partner for developers who refuse to compromise between speed and beauty.

Mission

To empower developers and architects with sustainable, cost-effective, and high-quality materials. We are committed to supporting the UAE's vision as a global innovation hub by delivering structural solutions that optimize resources while maximizing architectural impact and longevity.

Our Services

Prefabricated Houses

Factory-built modular units designed for fast installation, reduced site work, and consistent structural quality.

Container Modification

Conversion of shipping containers into functional spaces such as offices, housing, and commercial units with full customization

Steel Structure

Light gauge and structural steel systems engineered for fast construction, high strength, and efficient assembly.

Building Contracting

End-to-end construction services including planning, execution, and project management for various building types.

We delivers integrated construction solutions, supporting clients across the Saudi Arabia with efficient execution, controlled production, and consistent project delivery.

GFRP
(Glass Fiber
Reinforced Concrete)

Lightweight concrete panels used for façades, cladding, and architectural elements with high durability and design flexibility.

GFRP
(Glass Fiber
Reinforced Polymer)

High-performance composite solutions offering strength, corrosion resistance, and long-term durability for structural and industrial use.

GFRG
(Glass Fiber
Reinforced Gypsum)

Lightweight gypsum solutions designed for smooth finishes, intricate detailing, and high quality interior architectural applications.

**Transportation
Solutions**

Efficient handling and delivery of prefabricated units and materials, ensuring safe transport and timely project execution.

WHY CHOOSE US?

We deliver fast, reliable prefab and modular solutions backed by in-house production, skilled teams, and strict quality control.

3X

Faster
Project Delivery

Faster Production & Installation

Compared to conventional construction, we are helping you to meet tight project deadlines.

95%

Our Partners

PREFABRICATED HOUSES AND PORTA CABINS

We provide a wide array of prefabricated buildings, conversion solutions tailored for residential, commercial, and industrial projects, including labor camps and both onshore and offshore initiatives accommodating over 1,000 workers.

We design, manufacture, and install modular housing, offices, kiosks, and customized units as complete turnkey solutions.

Our structures are durable, cost-efficient, and faster to install than traditional construction. We convert shipping containers into functional spaces built for long-term use across the UAE and GCC.

CONTAINER MODIFICATION SOLUTION

We offer container modification solutions for commercial, industrial, and residential needs.

Our services transform shipping containers into offices, accommodation, storage, kiosks, and customized spaces that are durable and functional.

We manage the entire process from design and fabrication to delivery and installation, ensuring high-quality results and reliable performance.

GFRC | GLASS FIBER REINFORCED CONCRETE

We specialize in Glass Fiber Reinforced Concrete (GFRC) solutions for architectural and decorative applications.

We design and manufacture façade panels, cladding, murals, and custom decorative elements that are lightweight, durable, and aesthetically refined. Our GFRC products combine strength, precision, and design flexibility, making them ideal for both modern and traditional projects.

We handle the entire process from design and production to delivery and installation, ensuring high-quality results for every project.

KEY PROJECTS | GFRC MADAR PHASE 2

Zaha Hadid
Award-winning architect

ABM Industries was entrusted with the GFRC works for Madar Phase 2, a landmark development designed by **Zaha Hadid Architects**.

Our contribution included the design, production, and installation of custom GFRC cladding and architectural elements, carefully engineered to reflect the project's unique curves and dynamic forms.

GFRP | GLASS FIBER REINFORCED POLYMER

We offer specialized Glass Fiber Reinforced Polymer (GFRP) solutions that are lightweight, strong, and corrosion-resistant.

GFRP is ideal for construction and industrial applications, serving as a superior alternative to traditional materials like steel or wood.

Our services include the design, fabrication, and installation of custom elements such as gratings and cladding panels. By merging advanced technology with skilled craftsmanship, we provide durable, versatile, and cost-effective products.

KEY PROJECTS | GFRP | KAYAK CLUB

KAYAK CLUB

The Kayak Club building embodies a coastal elegance with its flowing, curved design that seamlessly connects indoor and outdoor spaces. Its fluid lines and transparent elements create a dynamic experience, reflecting the rhythms of the lagoon.

ABM Industries proudly supplied the GFRP works for this project. Helping realize its distinctive architectural vision.

OUR MANUFACTURING STRENGTH AND ENGINEERING CAPABILITY IN THE SAUDI ARABIA

Our factory utilizes modern machinery and a skilled workforce for large-scale onshore and offshore projects. Partnering with ABM Industries in the UAE and Pan Gulf Industries in Saudi Arabia, we ensure a strong, scalable workforce to meet regional demand.

High-tech Manufacturing

We operate dedicated production lines for bulk GFRP and GFRC manufacturing, with a fully equipped prefab and container modification facility. Our engineering and installation teams ensure precision and quality control, adhering to international standards for structural strength and durability in all projects.

DELIVERING RELIABLE SOLUTIONS

ABM Industries, based in the United Arab Emirates, has established a strong presence in the construction and industrial sector through consistent delivery and quality-driven solutions.

With over a decade of experience, we continue to support projects across prefab, GFRP, GFRP, and container-based solutions for residential, commercial, and industrial applications.

As part of our regional growth, **Pan Gulf** operates as our expansion in the Kingdom of Saudi Arabia, extending the same standards, expertise, and capabilities to serve a wider market across the GCC.

Together, we deliver reliable, efficient, and fully integrated solutions, ensuring consistent quality and performance across both the UAE and Saudi Arabia.
