

## **Acumen Improve Safety Delivers Heat Stress & Site Visibility that makes a real difference to businesses.**

Since 2004 Acumen have been helping organisation around the world improve their safety and wellbeing of their workforce through software that puts safety management in everyone's back pocket. Combining latest mobile technologies and and tried and trusted safety management learning model, Acumen have managed over 250,000 safety incidents, delivered capabilities to over 100,000 users and are trusted partners of organisations like Skanska, Qatar Construction Companies, Balfour Beatty, National Grid Gas UK, National Grid Power UK and Pitney Bowes.

*"What we love about Acumen is the fact that the software is based upon an empirical learning model - we have 100% trust in the capabilities Acumen Software delivers from every aspect of the business." - National Grid UK HSE Manager*

For many years organisations have struggled to manage heat stress related injuries and have real-time visibility of site activities to manage safety & wellbeing at any time or place. Acumen Software has now bridged that gap.

*"We deployed Acumen Safety Software 4 years ago on 8 major construction projects in Qatar. We need a solution that gave us real-time visibility of issues and gave our workforce instant directives on heat stress and weather issues. I can honestly say we have never looked back. Acumen Software gives us real-time capabilities to provide physical and virtual supervision of site work and delivers instant real-time communications to our work force when weather conditions can affect their health & wellbeing." Construction Director (Qatar Construction Delivery Director).*

For almost 20 years, Acumen has delivered insights into safety issues, improve safety management and drive down on site incidents in real-time. With our latest software platform, you will have instantaneous control of heat stress concerns, real-time visibility of site issues, virtual supervision with management of defects and the confidence that your workforce will go home safe and well.
