

## Safety, Environment, Quality, Work Permits Compliance and Incident Reporting

### Technology

Combining Smartphone Apps and Cloud-based Enterprise Management Systems for a secure and flexible solution to your business needs.

### Implementation

AcumenMobile's out of the box solutions deliver capabilities that require no new infrastructure in your business. Simply access, install and deploy solutions quickly and securely.

### Future Proof

The flexibility of AcumenMobile ensures you can use the solution to fit your changing business needs. AcumenMobile is optimised for Android, iOS and Windows platforms. The Enterprise Management Systems utilise the latest Windows Cloud capabilities.

### ISO Standards

- Acumen is accredited to:
- ISO 27001 Data Security
  - ISO 9001 Quality Assurance
  - ISO 45001 Health & Safety

### Safety & Compliance

85,000 engineers from organisations such as National Grid, Northern Gas and Southern Gas Networks already benefit from using AcumenMobile solutions to improve safety, quality and compliant work outcomes. With state of the art Safety, Environment, Quality, Work Permit Compliance and Incident Reporting capabilities; your business can also benefit from the power and flexibility of AcumenMobile. Combining the latest smart phone applications and enterprise management systems, your business will improve onsite safety, delivery quality assurance and drive compliance and transparency of incident reporting - all in real time, without paper. With in-built alerting, notifications and content management systems as standard, you are in full control of issues and non compliances.

### Flexible Workflows

AcumenMobile will enable your business to capture, manage and disseminate key business information for:

1. On Site Safety
2. Quality Assurance
3. Environmental Management
4. Permit Control

Each of these areas will be managed through a set of flexible digital inspection sheets, assessment forms and documented work procedures delivered through the software platform. By utilising the AcumenMobile solution, data transfer, analysis and reporting is conducted in real time.

### New Capabilities

AcumenMobile delivers a flexible and real-time secure solution to:

1. Conduct in-field inspections, assessments and compliance checks.
2. Enable the real-time alerting and notification of in-field issues and non compliances.

3. Ensures your field teams have correct and valid permit information for compliant working.
4. Delivers real-time 24\*7 access to your data from anywhere in the world.
5. Captures incidents, near misses and hazards in a quick and reliable process.
6. Provides direct access to reports, analysis and management information from online secure portals.
7. Manages the life cycle of issues raised and the non-compliance closure routines with resolutions.

### Business Focused

Supporting business initiatives and operational campaigns with technical solutions is critical in business. The AcumenMobile platform directly supports Qatar Gas Routine Task Safety Campaigns by providing direct control of onsite safety and awareness.

### Paperless Solution

Designed to remove paper from your business work flows, AcumenMobile directly supports the Qatar Gas Go Digital : Go Green Environmental Initiative with a paperless system. To date, AcumenMobile has removed 2.5million paper transactions.

### Real Time Access

With the latest mobile phone and server platforms, AcumenMobile ensures you have real-time 24\*7 access to your data, services and information. Through the cloud-based channel, there is no need to install any additional infrastructure as this is provided by AcumenMobile in the cloud.

### Local & Remote Support

AcumenMobile solutions combine leading edge technologies with great customer support. The AcumenMobile support team provides Tier One & Two Support.
