up to 80 dB

Acoustic Group company was founded in 1999. The same year the company's management decided to launch business activities on development and promotion of innovative products in building acoustics, as well as standard solutions for room soundproofing in industrial and civil construction.

Acoustic Group creates acoustic comfort in all areas of human life. This is about a quiet private dwelling, a comfortable office, where you can hear only what is important and informative, excellent conditions in music and theater halls, and a cozy street atmosphere.

Nowadays, Acoustic Group encompasses:

14 offices and 4 industrial complexes located in the Russian Federation, the CIS and Europe a complex of small measurement chambers; patents for inventions and utility models materials and structures for insulation of airborne and impact noise, for vibration isolation of engineering equipment and entire buildings, sound-absorbing materials and structures, sound-proof screens research and development, acoustic measurements, design, educational work acoustic consulting, including design work within self-regulating organizations (SRO) established partnership and commercial communication with leading global and domestic manufacturers in construction industry.

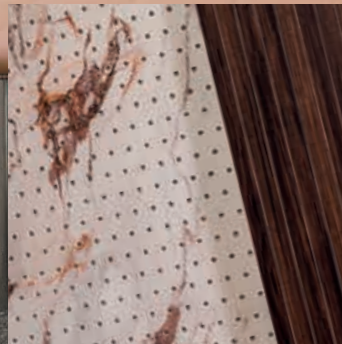

This brochure presents decors with maximum acoustic efficiency. The proposed decorative solutions using materials of the Acoustic Group trademark have been successfully tested and confirmed their high acoustic and operational characteristics.

BONACOUSTIC

Non-flammable and fire-retardant MgO-based acoustic wall panels and ceilings

- Substantial reduction in ambient noise
- Diverse finishing options and perforation choices
- Utilizes safe MgO base material with exclusive fire-resistant printing

BONI
ACOUSTIC

DECOUSTIC

CDF-based seamless acoustic
wall panels and ceiling

- Substantial reduction in ambient noise
- Diverse finishing options and perforation choices
- Utilizes seamless mounting system designed for premium-class projects.

SOUNDBOARD

Woodwool cement acoustic boards

- Exceptional durability and easy maintenance
- Outstanding acoustic performance
- Reliable fire safety and eco-friendliness

SOUNDBOARD

SOUNDLUX

Incombustible sound-absorbing perforated metal panels and baffles

- High mechanical strength of outer surface
- 100% incombustible
- Effective sound absorbance

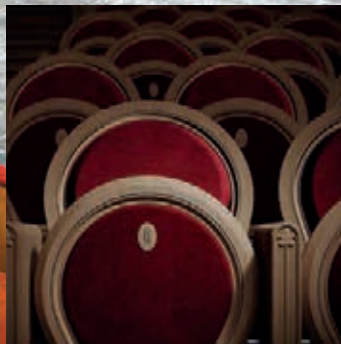

SOUNDLUX

AKUTEX

System solutions for concert halls

- Professional solutions for multi-purpose halls
- Reduction of reverberation time in sound reinforcement mode
- High degree of sound absorption

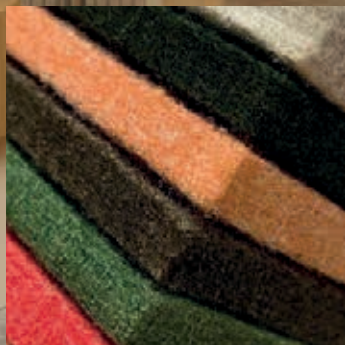

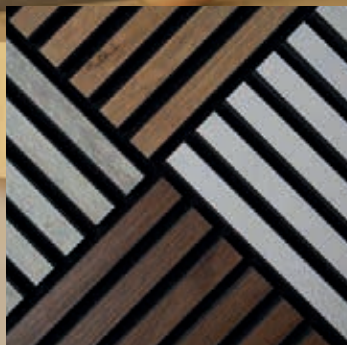

akutex

FLEXAKUSTIK

Acoustic felt-based panels, slats
and elements

- Optimal sound absorption
- Easy installation
- The ability to create flexible surfaces

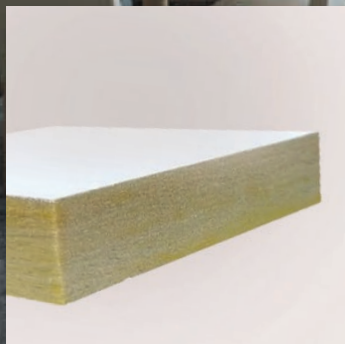

flexakustik

AKUFON

Fiberglass acoustic panels and elements

- High acoustic efficiency due to fiberglass high density
- Customizable color options to match any design
- Fire resistance and environmental safety

AKUFON

ULTRASPRAY

Sound-absorbing coating

- Sprayed directly onto the surface
- Preserves the height of the room and space
- Allows you to cover large volumes of ceilings in a short time
