*We have the BUTYL BUSINESS taped...*

## Roofing and Cladding

All metal and polycarbonate roof sheeting can be sealed at the end and side laps by applying Butyl tape. Perfect for sealing rain water down pipes as well as gutters.

## HVAC

Butyl Tape is used for sealing duct flanges in HVAC systems, air, dust or water seal for compression joints and seams. Heating & Ventilation market has found this product to be preferable to other methods of sealing flanges.

## Tanks and Silo's

The WRAS formulation, butyl tape, has been specially formulated for sealing flange joints of sectional water tanks and has been approved for use in contact with drinking water by Water Regulations Advisory Scheme Ltd in the UK. (Approval no: 2311510)

## Electrical (Rubber Based Mastic Putty/Tape)

Bu-tack Mastic Putty/Tape is a self-amalgamating electrical insulation and moulding tape. This product is especially good for the use around uneven surfaces for low and medium voltage applications where connections on to busbars and bushings need to be insulated and to create a smooth profile on these connections.

## Electrical (Mastic Tape)

Butyl self-amalgamating mastic tape is used to provide superior waterproofing and sealing to low and medium voltage cable joints, terminations as well as in telecom installations. Our B2 tape has excellent adhesive, sealing, electrical and anti-aging properties and is UV resistant.

## Joint Sealer

Butyl joint sealer is used for sealing of concrete butt joints (interlocking joint pipes) in pre-cast elements e.g. manhole rings and culverts. Butyl joint sealer is also used for lap sealing between panels such as steel, aluminium and porcelain as well as a variety of other joints subject to shear between similar and dissimilar materials e.g. IBR roof sheets, HVAC, water tanks.

## Automotive

Automotive uses include sealing around the frames of sunroofs, in the dust panels inside car doors, around head and rear lights in panel beating shops and as well as mounting tracking devices.

## Paintless Dent Removal (PDR)

**Cold Glue Dent Putty**  
This product is used for dent removal in the automotive repair industry (PDR) and works best when used in combination with a sliding hammer using a high force pulling motion. General uses include dent removal on sheet metal, household products and appliances.

## Caravan and Trailer

Butyl tape is used as a water seal in various caravan construction applications. Caravan and trailer manufacturers have many applications such as sealing between mouldings and the outer skin, lap joints on the body work and other areas where fittings are attached piercing the outer skin.
