

# EQUITONE

Fibre cement cladding  
for modern and sustainable facades

## Authenticity

Original through-coloured materials with highly expressive fibre cement structure.

## Natural feel

The rough, sanded surface looks as if it was created naturally and invites you to touch it.

## Sustainability

All EQUITONE materials are highly sustainable, safe and Cradle to Cradle certified.

## Modernity

EQUITONE gives a modern aesthetic to the facade, blending smoothly into contexts with a distinct local identity.

*EQUITONE is a through-coloured facade material designed by and for architects. With endless design possibilities and a wide availability of natural colours inspired by the heritage of the past, our authentic fibre cement panels bring minerality and premium design to the facade.*
