

EASYWAND

Pannello coibentato completamente liscio, creato per rivestimenti di edifici industriali e civili
Insulated flat panel, designed for cladding of industrial and civil buildings

ALU-SKIN

Il nuovo sistema a doga metallica per il rivestimento e risanamento di pareti / New metal siding system for cladding and building rehabilitation

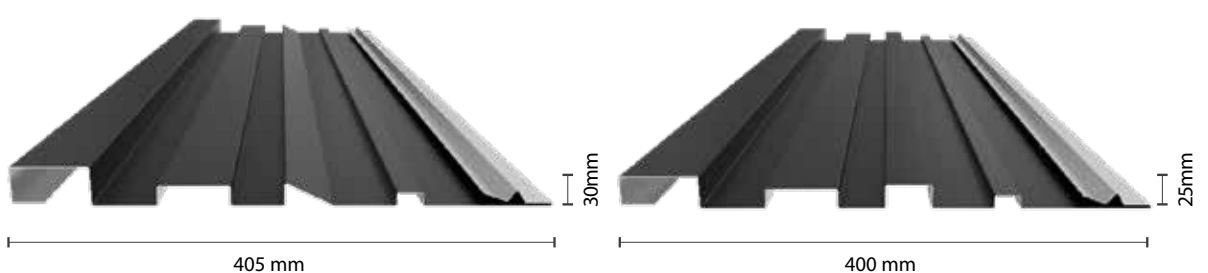

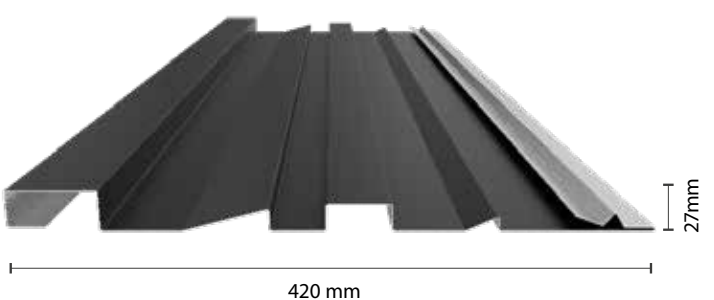

OND-ALL33

Il sistema metallico ondulato di Alubel per il rivestimento degli edifici
Sinusoidal metal system ideal for building cladding

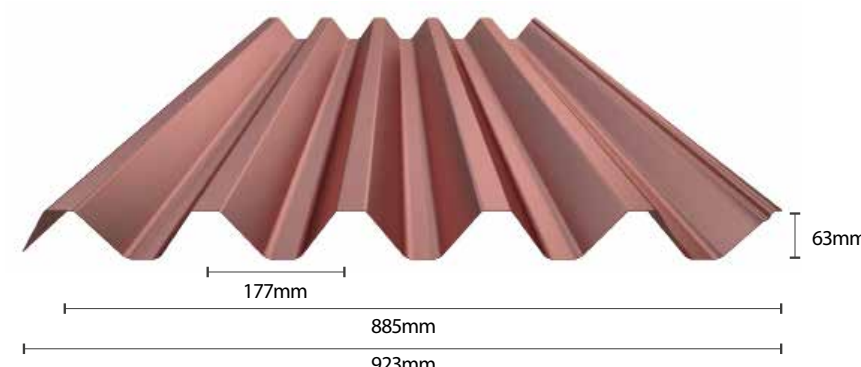

Alubel Forma

Nuovo sistema di rivestimento metallico che permette di realizzare una facciata completamente personalizzabile / New metal cladding system that makes it possible to create a completely customisable façade

FIBRALL

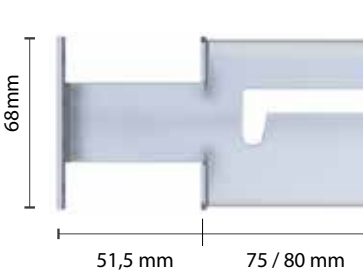

Profilo speciale per ricoperture su lastre in fibrocemento euro 177/51
Special profile for re-roofing on cement sheets euro 177/51

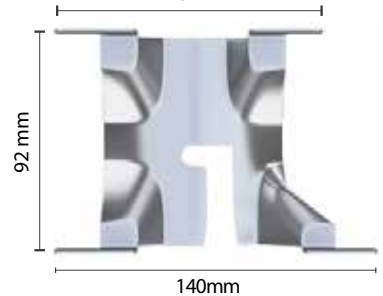

RIBLOK

Sistema di fissaggio di una nuova copertura su una vecchia superficie
Bracket for fixing a new roofing on an old underlying roofing surface

A Per sottostruttura in legno
For wood understructure

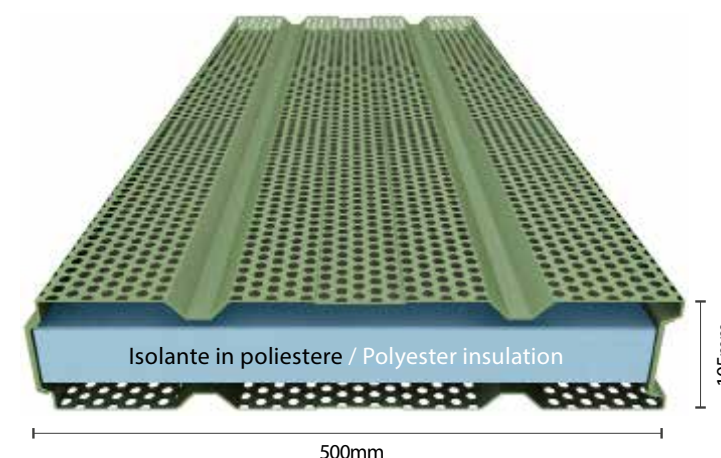

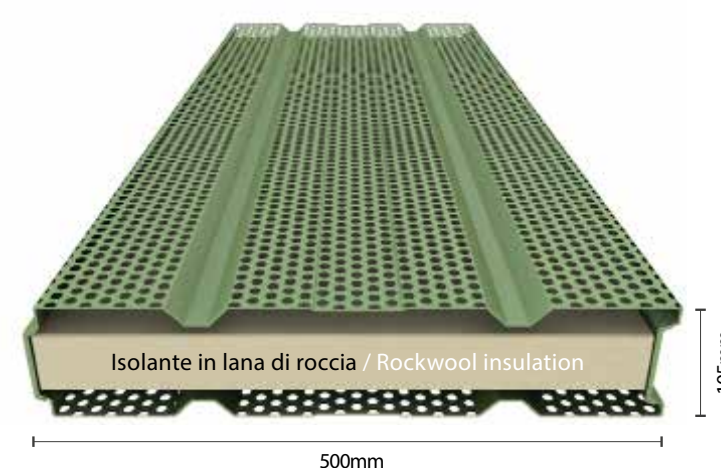

B Per sottostruttura con profili Omega
For understructure with Omega profiles

ALUFON

Pannello fonoisolante e fonoassorbente
Sound insulating and sound absorbing panel

DISCOVER ALUBELWORLD

Tutte le soluzioni per coperture metalliche, rivestimenti di facciata e sistemi strutturali.

All solutions for metal roofing, facade claddings, and structural systems.

sistemi di copertura / 1

Sistemi di copertura concepiti per rispondere a specifiche esigenze; ampia varietà di lastre metalliche grecate, con varie geometrie e differenti caratteristiche tecniche che le contraddistinguono.
Roofing systems - designed to meet specific needs; wide variety of corrugated metal sheets, with various geometries and different technical characteristics that distinguish them.

sistemi strutturali / 2

Sistemi strutturali utilizzati come solai di copertura, solai intermedi o cassero a perdere: si tratta di innovative soluzioni che permettono di soddisfare esigenze di leggerezza, comportamento antisismico, semplicità di posa e rispetto dell'ambiente.
Structural floors - Structural systems used as roofing floors, intermediate floors or composite floors: these are innovative solutions that allow you to meet the needs of lightness, anti-seismic performance, ease of installation and respect for the environment.

sistemi di facciata / 3

I sistemi di facciata Alubel sono costituiti da una sottostruttura portante e regolabile da ancorare alla parete da rivestire, sulla quale si vanno ad innestare in modo rapido e sicuro i profili per facciata di Alubel.
Facade systems - Alubel facade systems are composed by a bearing and adjustable understructure, to be fastened to a wall to be cladded, where Alubel profiles are inserted in safe and fast way.

sistemi per risanamento / 4

Prodotti specifici che rappresentano oggi sul mercato le migliori soluzioni in termini di rapidità-costo per la sostituzione o la ricopertura di lastre in fibrocemento. Roof renovation systems - Specific products that represent the best solutions on the market today in terms of speed-cost for replacing or covering fiber cement sheets.

sistemi di montaggio per fotovoltaico / 5

Sistema di elementi in estruso di alluminio realizzati al fine di garantire un'ottimale applicazione di impianti fotovoltaici sui sistemi di copertura Alubel.
PV mounting systems - A system of extruded aluminum elements designed to ensure efficient application of photovoltaic systems on Alubel roofing systems.

sistemi linea vita / 6

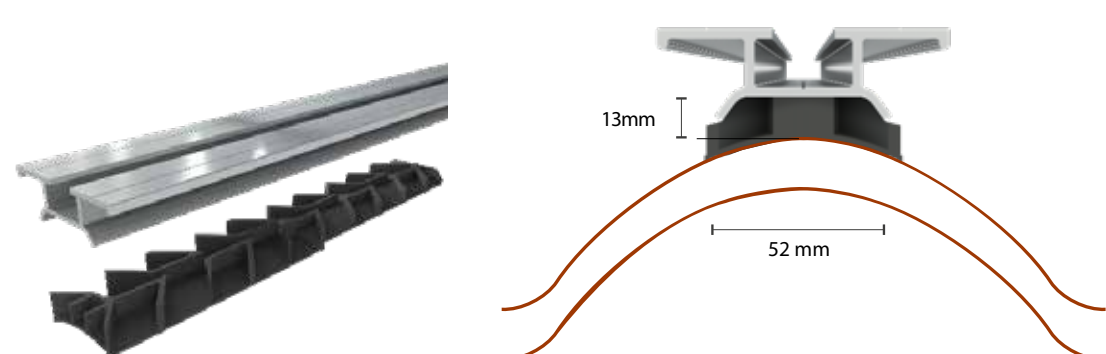

Una gamma completa di soluzioni semplici, efficaci e di rapida installazione che si adatta ad ogni sistema di copertura, garantendo il rispetto delle normative vigenti.
Fall protection systems - A complete range of simple, effective and quick-to-install solutions that can be adapted to any roofing system, ensuring compliance with current regulations.

sistemi per abbattimento acustico / 7

Sistemi metallici per l'abbattimento acustico: pannelli fonoisolanti e fonoassorbenti
Anti-noise barrier systems - sound insulating and sound absorbing panels

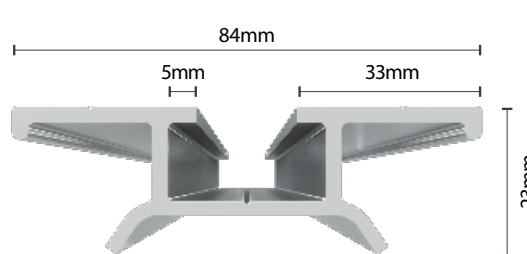

IsoCoppo FV

Soluzione per impianto fotovoltaico su sistema Coppo/IsoCoppo
Solution for a photovoltaic installation on a Coppo/IsoCoppo system

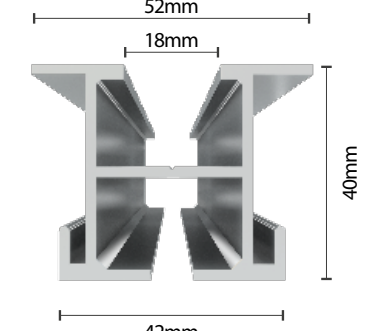

Alubel First

Soluzione per impianto fotovoltaico su orditura semplice / Solution for a photovoltaic installation on a single roof framework

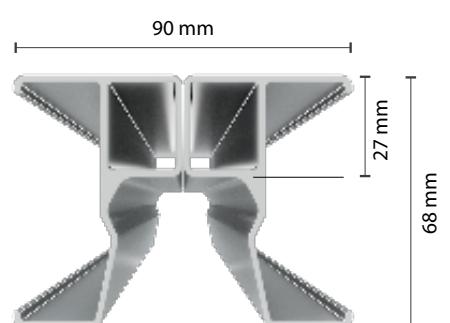

Alubel Second

Soluzione per impianto fotovoltaico su orditura incrociata / Solution for a photovoltaic installation on a cross roof framework

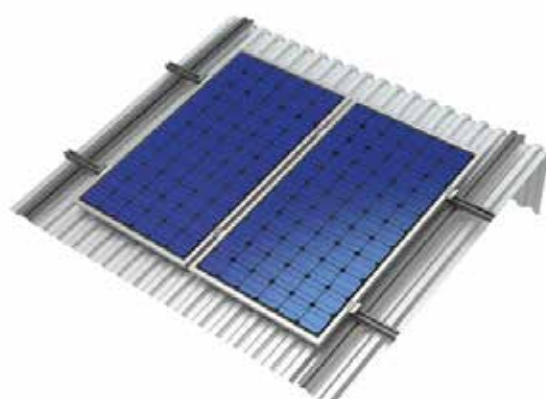

Alugraf Universal

Soluzione per impianto fotovoltaico su copertura Alugraf / Solution for a photovoltaic installation on Alugraf roofing

Sistema ShedPlus

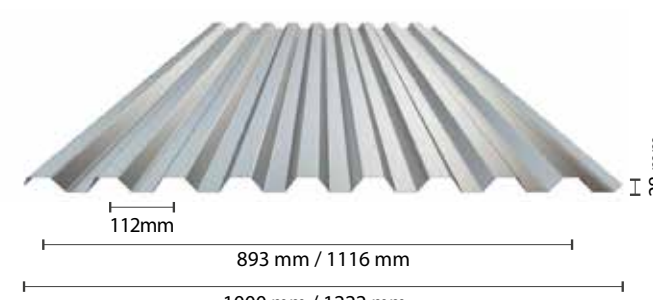

Soluzione per impianti fotovoltaici su strutture a Y / ShedPlus, solution for a photovoltaic installation on a Y shaped structures

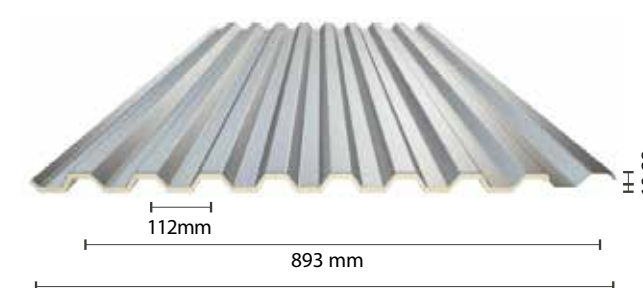

ALUBEL 28

Il sistema integrato più completo per coperture e rivestimenti / The most complete integrated system for roofing and cladding

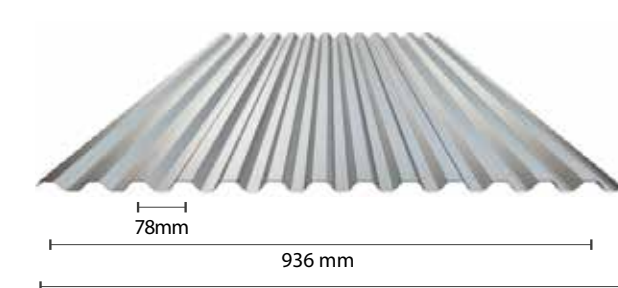

TEK 28

Lastra metallica accoppiata con poliuretano espanso alta densità / Metal sheet coupled to high density expanded polyurethane

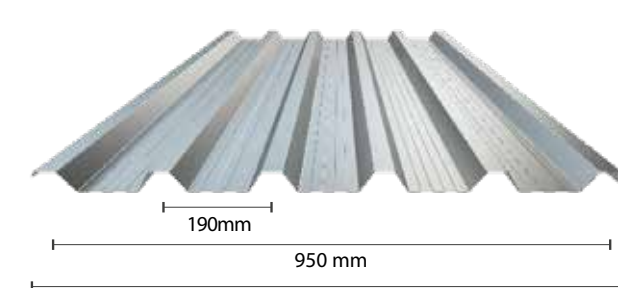

ALUBEL 21

Lastra grecata per copertura e rivestimento / Corrugated sheet for roofing and cladding

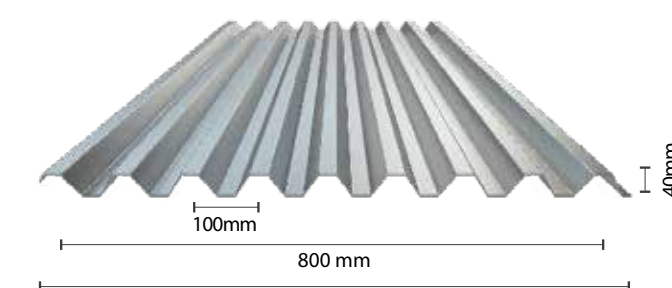

ALUBEL 40

Lastra grecata per copertura / Corrugated sheet for roofing

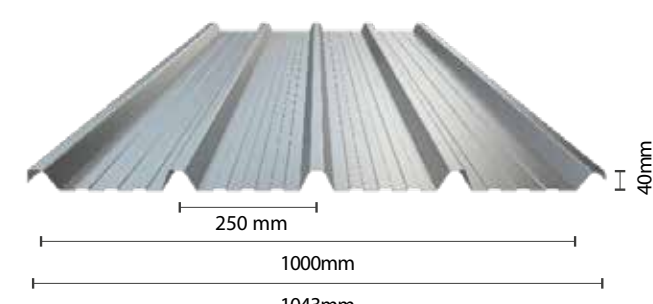

ALUBEL 44

Lastra grecata per copertura e rivestimento / Corrugated sheet for roofing and cladding

ALUBEL Dach

Lastra grecata per copertura / Corrugated sheet for roofing

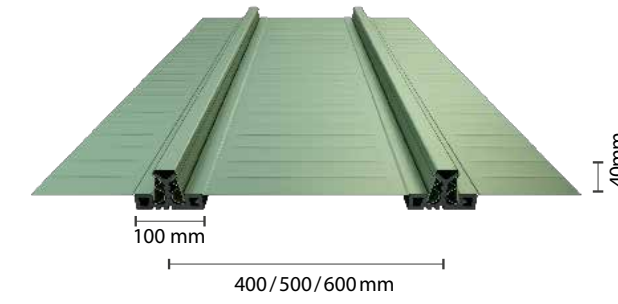

ALUBEL 15

Profilo microgrecato per controsoffittature / Micro-corrugated profile for false ceilings

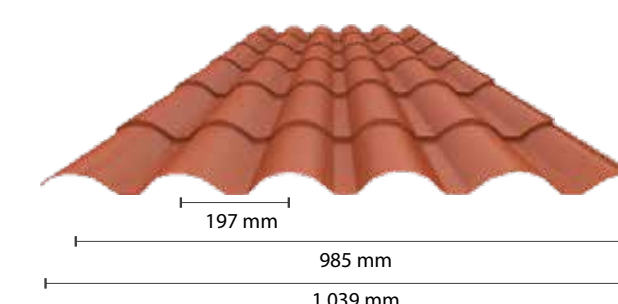

ALUGRAF

Il sistema di copertura senza limiti / Roofing system with no limits

IL COPPO di Alubel

Lastra stampata a forma di coppo / Tile shaped pressed sheet

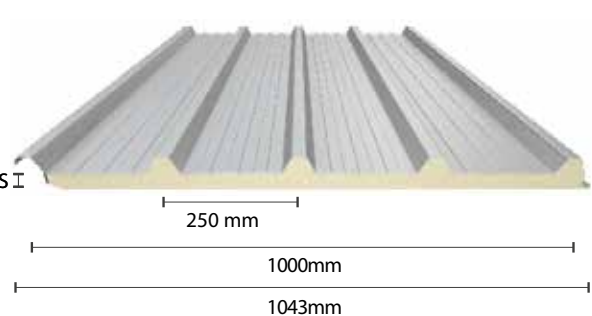

SottoCoppo

Sistema metallico da sottocopertura / Under-tile metal system

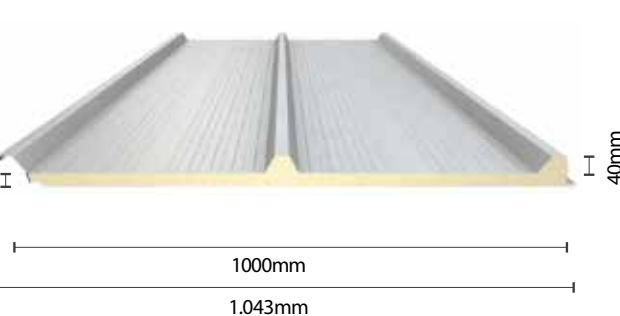

ALUTECH DACH

Pannello coibentato multistrato a cinque greche / Multilayer insulated sandwich panel with five corrugations

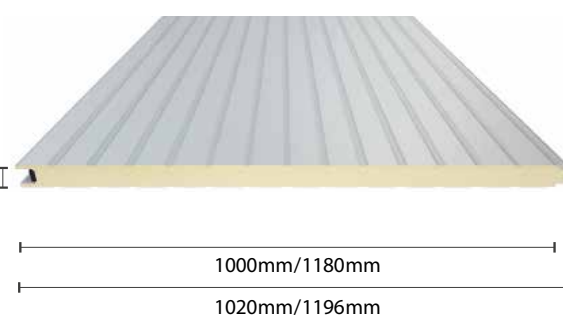

ALUTECH DACH

Alutech Dach tre greche, pannello coibentato multistrato / Multilayer insulated sandwich panel with three corrugations

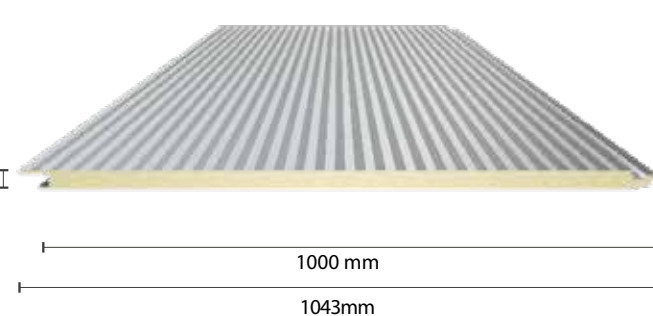

ALUTECH WALL

Pannello simmetrico coibentato piano / Flat insulated symmetrical panel

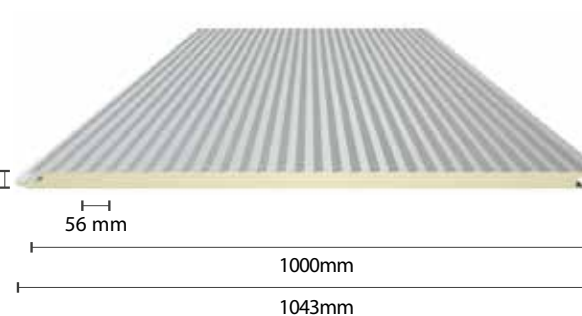

ALUTECH WAND X

Pannello coibentato piano con innovativo fissaggio nascosto / Flat insulated panel with innovative hidden fixing

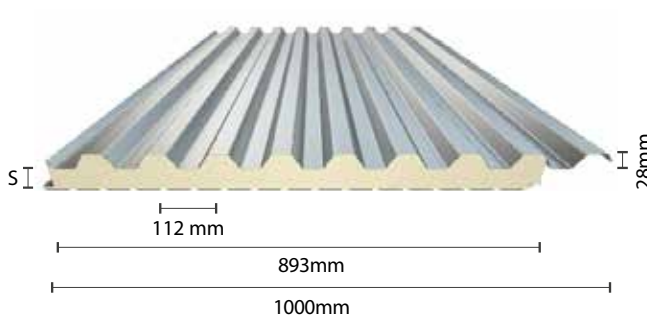

ALUTECH WAND

Pannello coibentato piano con fissaggio nascosto / Flat insulated panel with hidden fixing

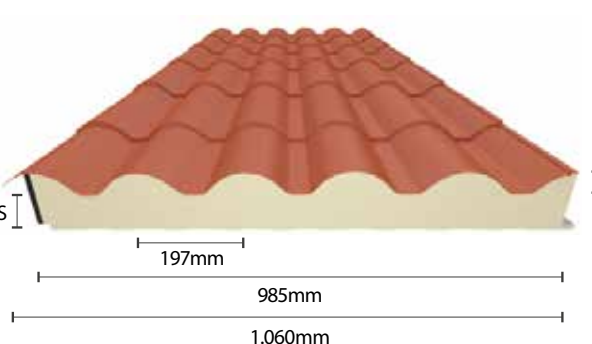

TEK 28 PIANO

Innovativo pannello coibentato sandwich profilo Alubel 28 / Alubel 28 innovative sandwich panel

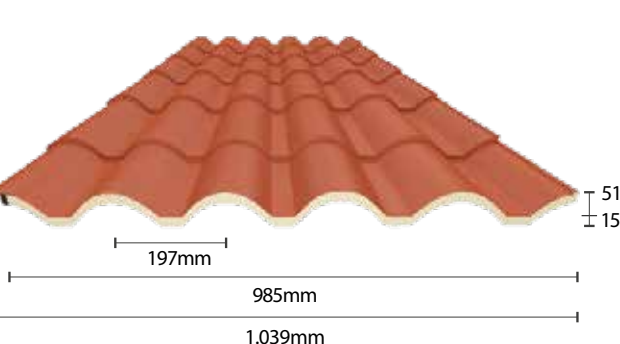

IscCoppo piano

Pannello strutturale coibentato stampato a forma di coppo / Insulated structural sandwich panel pressed in the shape of a tile

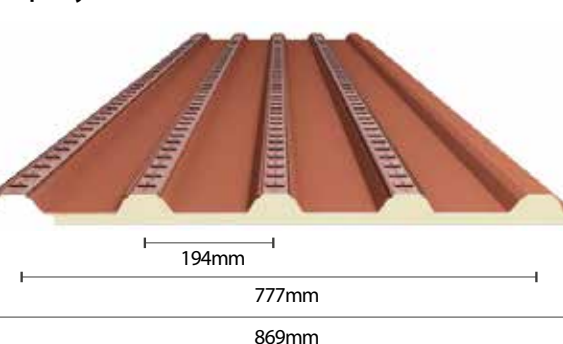

IscCoppo Tek

Lastra metallica a forma di coppo accoppiata con poliuretano ad alta densità / Tile shaped metal sheet coupled to high density polyurethane

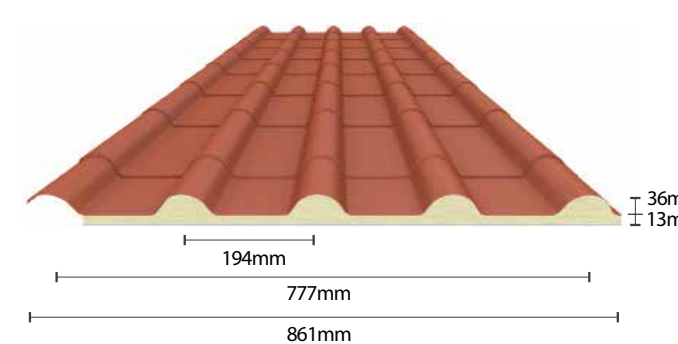

SottoCoppo piano

Lastra metallica SottoCoppo accoppiata con poliuretano ad alta densità / Coppo Roma metal sheet coupled with high density polyurethane

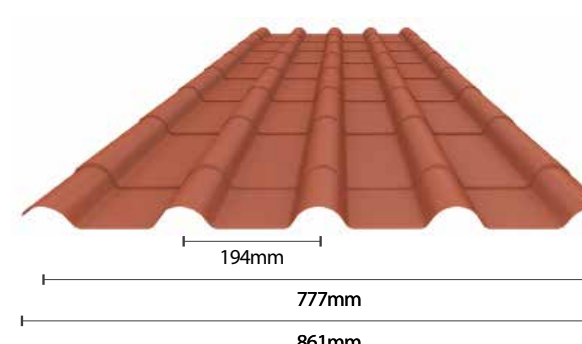

Coppo Roma piano

Lastra metallica Coppo Roma accoppiata con poliuretano ad alta densità / Coppo Roma metal sheet coupled with high density polyurethane

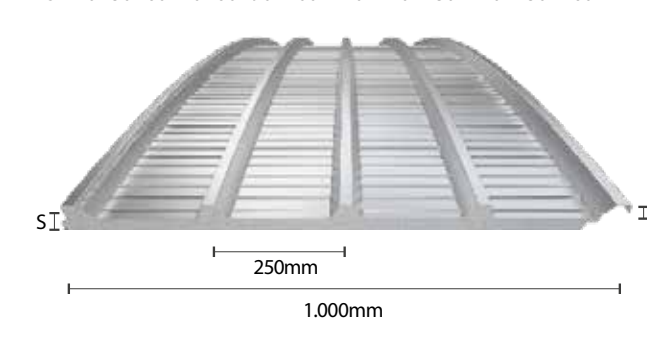

Coppo Roma

Sistema tecnologico di copertura a forma di coppo tradizionale / Traditional tile-shaped technological roofing system

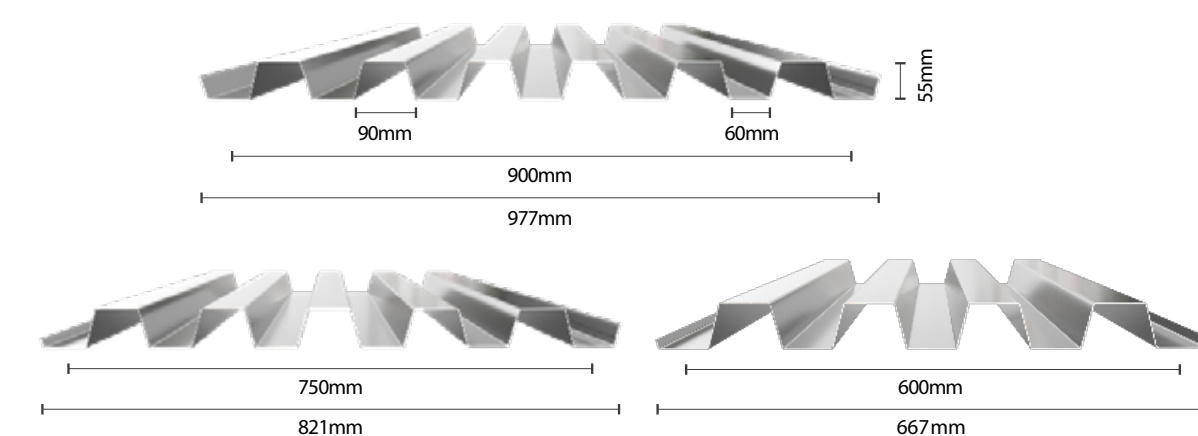

ALUCOP DACH

Pannello curvo coibentato multistrato a cinque greche in polistirene / Multilayer polystyrene insulated curved sandwich panel

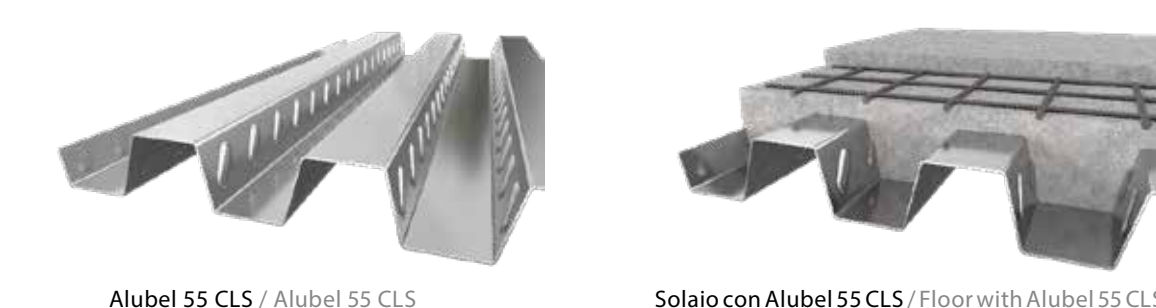

ALUBEL 55

Lo standard degli elementi portanti da solaio / The construction standard in collaborating slabs

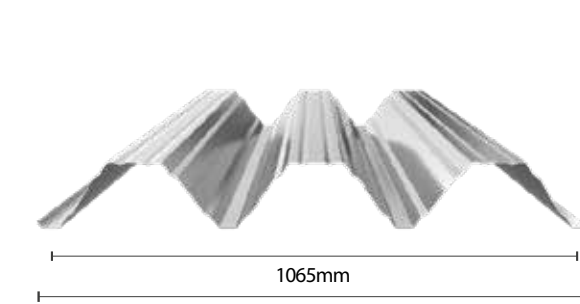

ALUBEL 55 CLS

La soluzione per solai collaboranti / Perfect solution for collaborative slabs

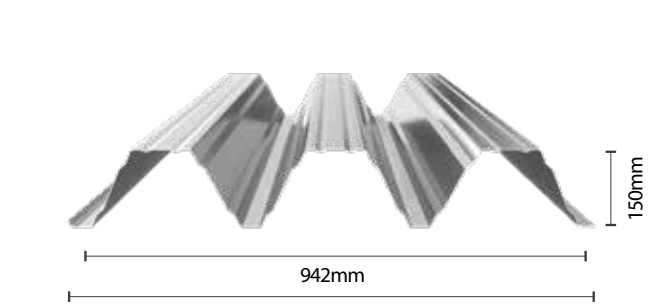

ALUBEL 135

Solaio strutturale per grandi luci / Structural floor for large span

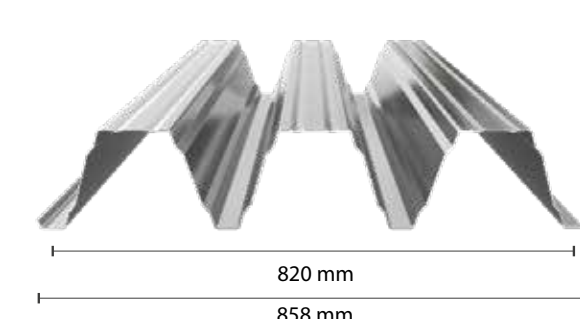

ALUBEL 150

Solaio strutturale per grandi luci / Structural floor for large span

ALUBEL 160

Solaio strutturale per grandi luci / Structural floor for large span

ALUBEL 215

Innovativo maxi solaio strutturale / Innovative maxi-structural floor
